

Building a 1000 Company ICP Database in 30 Days

Objective

The objective is to build a verified database of 1000 DeepThought ICP-qualified companies within one month while maintaining research quality and minimizing false positives.

Week 1 – Build the Initial Universe

Sources:

- LinkedIn
- Industry associations
- IndiaMART
- TradeIndia
- Startup India database
- Export promotion councils
- State industrial development corporations
- Industry-specific directories

Target:

Create an initial universe of approximately 5000 companies.

Week 2 – Automated Qualification

Use AI-assisted workflows to classify companies based on:

- Industry segment
- Manufacturing presence
- Location
- Revenue indicators
- Growth signals

Companies failing basic eligibility criteria are removed.

Expected output:

Approximately 2000 companies.

Week 3 – Deep Qualification

Evaluate remaining companies using the Federer framework.

Focus areas:

- Differentiation
- Leadership quality

- Systems maturity
- Growth signals
- Succession planning

Expected output:

1200–1500 companies.

Week 4 – Quality Control and Final Selection

Perform manual verification on borderline cases.

Cross-check:

- Company websites
- LinkedIn
- News sources
- MCA records
- Annual reports

Remove false positives and finalize the database.

Expected output:

1000 verified ICP-qualified companies.

Quality Control Framework

Every company must pass:

1. Producer Test
2. India Operations Test
3. Revenue Range Test
4. Growth Signal Verification
5. Systems Maturity Verification

No company is included based solely on AI-generated information.

Expected Funnel

Initial Universe: 5000

Eligibility Pass: 2000

Deep Qualification Pass: 1200–1500

Final Verified Database: 1000

Technology Stack

- AI tools for discovery and summarization
- Spreadsheet-based scoring
- Public databases
- LinkedIn
- MCA records
- Company websites

Conclusion

The combination of automated discovery and manual verification allows a high-quality 1000-company database to be built within one month while maintaining DeepThought's research standards.
